## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5, 6, 7, 12, 13, 16, 17, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Yasuhara et al. (EP 1073123).

With respect to claims 1, 4, 5, 6, 7, 12, 13, 16, 17, and 18, Yashuhara et al. anticipate the claimed invention. **See the rejections of office actions dated 08/18/05 and 01/03/06.**

Further with respect to claims 1 and 13 as currently amended, Yashuhara et al. further teach each of the plurality of auxiliary electrodes 14 has relatively similar dimensions in the lateral direction and the second terminal zone 5 and the channel 2 are separated by a distance in a lateral direction. See figs. 1 and 2.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 10, 19, 9, 11, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yasuhara et al. (EP 1073123) as applied to claims 1, 4, 5,

6, 7, 12, 13, 16, 17, and 18 above, and further in view of Gajda et al. (US publication 2003/004255).

With respect to claims 8, 10, 19, 9, 11, and 20, Yashuhara et al. in view of Gajda et al. teach the claimed invention. **See the rejections of office actions dated 08/18/05 and 01/03/06.**
